Future-ready students. Fully managed labs. Zero Year-1 risk for PCMC.

BEFORE

AFTER

01

OVERVIEW

Executive Summary

RoboPirate proposes a **5-year WESmart Labpilot** for Pimpri-Chinchwad Municipal Corporation schools covering **Grades 5 through 9**. Thepilot uses a de-risked, blended funding model — **Year 1 is fully underwritten by a corporate CSR partner**; Years 2–5 are funded by PCMC's education budget. PCMC carries **zero financial risk in Year 1**, sees measurable student outcomes before committing its own budget, and gains a 5-year fully-managed STEAM Lab at a **per-student cost lower than any standalone option** in the market.

The 5-Year Pilot Structure

Year	Funding Source	Amount	Scope
Year 1 2026–27	CSR Partner (Corporate)	■ 12,00,000	Complete lab setup + Year 1 operations
Year 2 2027–28	PCMC Education Budget	■ 7,00,000	Annual subscription
Year 3 2028–29	PCMC Education Budget	■ 7,00,000	Annual subscription
Year 4 2029–30	PCMC Education Budget	■ 7,00,000	Annual subscription
Year 5 2030–31	PCMC Education Budget	■ 7,00,000	Annual subscription + impact study
5-YEAR TOTAL	Blended	■ 40,00,000	PCMC contributes ■28L over 4 years · CSR contributes ■12L

Why this structure works for PCMC

Year 1 is already covered by a CSR partner. PCMC only commits budget from Year 2 — after the lab is running and measurable outcomes are visible. If Year 1 underperforms, PCMC can decline to continue. This is the **lowest-risk entry point** for a multi-year STEAM program.

Proven Track Record — Not a First Attempt

- ✓ **Veer Baji Prabhu Vidyalaya** (Pune Govt School) — full Academic Year 2024–25 CSR-funded Smart Lab, Grades 1–7, **Cummins-sponsored**
- ✓ **Sangli District Collector Pilot** — in partnership with Shri Ashok Kakade IAS; covered by ABP Majha, Star News Marathi and 3 other outlets
- ✓ **85+ CSR labs** already operational across UP, Maharashtra, West Bengal, Karnataka, Delhi and Goa
- ✓ **55,000+ students** have completed **1.5 lakh+ hands-on projects** through RoboPirate labs

02

CASE STUDY 01

Veer Baji Prabhu Vidyalyaya

AY 2024–25 · COMPLETED

CSR · CUMMINS

GRADES 1–7

GOVT SCHOOL · PUNE

A CSR-Funded Smart Lab That Worked. CSR Partner: Cummins · Implementation: Worship Earth Foundation · Duration: Sep 2024 – Mar 2025

The Problem We Solved

Veer Baji Prabhu Vidyalyaya is a government school with limited access to structured hands-on STEM learning, no permanent technical instructor, and minimal exposure to future-ready skills. The CSR partner wanted **verifiable impact — not a one-day workshop photo-op**.

What We Delivered

Dimension	Outcome
Grade Coverage	All 7 primary grades (1–7) with age-appropriate modules — Masterboard, Micro:bit, Structure Building, Basic Electronics, App Dev + Otto Bot, Arduino IoT, LEO AI Concepts
Instructor Deployment	1 local instructor hired from the community, trained and certified in-house by RoboPirate, deployed full-time for the entire academic year
Attendance Record	Consistent weekly participation tracked Sep–Mar; minor seasonal dip in Dec (holidays) recovered immediately after
Learning Progression	Students moved from guided activities to independent builds; successfully built and tested basic electronic and robotic systems
Social Impact	Local employment creation — instructor hired from an underprivileged background, earning a full year's wage through the program

Why this matters for PCMC

Veer Baji is the **template** for what we propose for PCMC. It proves that RoboPirate can deliver a full-year, measurable-outcome Smart Lab in a government-school setting, underwritten by a corporate CSR partner, with a locally hired instructor — **exactly the structure being proposed here, just scaled to 5 years and Grades 5–9**.

What the Cummins + Worship Earth Partnership Validated

- ✓ CSR-underwritten Smart Labs are **executable, auditable, and repeatable**
- ✓ Local instructor model works — reduces cost and builds community employment
- ✓ Student attendance and engagement holds across a full academic year
- ✓ Grade-wise progression is viable in government-school conditions
- ✓ Program is **NEP + NCF aligned** and produces measurable outcomes

03 CASE STUDY 02

Sangli Collector's Pilot

MEDIA-COVERED

GOVT-INITIATED

IAS LEADERSHIP

SCALED · PHASE II

Initiator: Shri Ashok Kakade IAS, Hon. District Collector, Sangli · **Schools:** K.R.V. Mook-Badhir School, Miraj (hearing-impaired students) · Baal Gruh, Sangli · **Implementation Partner:** Worship Earth Foundation · **Focus:** Inclusive AI & Robotics for specially-abled.

Why this pilot is significant for PCMC

Sangli is RoboPirate's **direct-with-government precedent**. It was initiated and publicly endorsed by a **serving IAS District Collector**, executed in two schools, and delivered measurable outcomes in the most challenging of settings — a school for hearing-impaired students. **If it worked there, it works in any PCMC school.**

Phase 1 — Pilot Validation Outcomes

- ✓ **15-day intensive training** delivered by RoboPirate's in-house certified trainers
- ✓ **Book launch on AI basics** personally inaugurated by the District Collector
- ✓ **11 different sensors** taught via Masterboard platform with LED + buzzer feedback
- ✓ **3D printing fundamentals** — students built and printed physical prototypes
- ✓ **12 student projects** completed and presented publicly
- ✓ **Public exhibition** organized by the Collector's office — students sold their creations
- ✓ **Certified local instructors** from underprivileged backgrounds deployed
- ✓ **Phase II replicated** in a second school (Baal Gruh), validating scale-up

Phase 2 — Scaled Curriculum

Masterboard
Electronics Basics

Line Follower
3D Printing

Drone Module
Soldering & Safety

Wired RC Car
Daily AI Integration

MEDIA COVERAGE · VALIDATED PUBLICLY

ABP Majha · Star News Marathi · Bandhuta News · SBN Marathi · Worship Earth Foundation

"Sangli is a district collector mandate. PCMC is a municipal corporation mandate. The operational DNA is identical: government leadership, CSR capital, structured multi-school rollout, measurable outcomes, public accountability. Every lesson from Sangli applies directly to PCMC."

04

ABOUT US

Built Since 2020

RoboPirate is a STEAM & AI Smart Lab provider headquartered in Baner, Pune. We design, install, and fully operate hands-on robotics, coding, AI, and IoT labs inside schools — a **single-partner model** where the school (or municipality) provides the room, and we handle everything else.

Our Build Story

2018

Idea born in a college robotics club — learning through doing

2020

Company officially registered · first grade-specific robotics kits for schools

2021

Launched LEO — programmable car with IoT + ML (Scratch · Python · C++)

2022

Developed full grade-wise curriculum and custom kits for every grade level

2023

First remote government school project · built DIY curricula that work even without a teacher

2024

Scaled to 19 schools · launched proprietary LMS + simulators

2025

Launched WE Smart Lab (kits + books + full-time teacher + complete lab setup) · crossed 85 schools

DIY KIT CATALOG

100%

The Single-Partner Advantage

Most STEAM initiatives fail because responsibilities are split — one vendor sends kits, another sends a teacher, a third owns curriculum. **Accountability vanishes.** RoboPirate solves this by owning the entire delivery:

Function	Responsibility
Lab infrastructure (furniture, wiring, paint, posters, interiors)	RoboPirate
120+ DIY kits (robotics, AI, IoT, 3D printing, coding)	RoboPirate
Full-time on-site trained teacher (locally hired)	RoboPirate
Grade-wise NEP + NCF-aligned curriculum	RoboPirate
LMS portal, assessments, student journals, quarterly reports	RoboPirate
Classroom space (approx. 250 sq.ft.) + electricity + connectivity	School / PCMC

05 THE MOMENT

Why PCMC · Why Now

The National Mandate

NEP2020 and the **National Curriculum Framework** require Indian schools to introduce coding, computational thinking, and experiential STEAM learning from Grade 6 onwards. Central schemes — **PM SHRI, Samagra Shiksha, Atal Tinkering Labs** — are pushing municipal and government schools to deliver hands-on tech education. **Most lack the infrastructure, trained teachers, and curriculum to execute.**

The PCMC Opportunity

Pimpri-Chinchwad is one of India's leading industrial and tech municipalities, home to major corporates — **Bajaj, Tata Motors, Cummins, Tech Mahindra, Thermax, Forbes Marshall, Persistent Systems** — with substantial CSR education budgets. PCMC is uniquely positioned to:

- ✓ **Channel CSR capital** from local corporates directly into its own municipal schools
- ✓ Deliver **NEP-compliant STEAM education with zero upfront municipal capex**
- ✓ Create a **showcase pilot** that can scale across all PCMC schools over 5 years
- ✓ Give municipal-school students access to the **same future-ready skills as private-school peers**

Timing matters — decide this quarter

April 2026 is the start of the new financial year for both **corporate CSR (FY 2026–27)** and **municipal budgets**. A decision now lets us lock a CSR partner for Year 1, complete lab setup by monsoon, and **begin classes in the July 2026 academic session**.

₹1,000

EFFECTIVE PER-STUDENT COST PER YEAR

■ 40L total ÷ 400 students ÷ 5 years · vs ■ 2,050 standalone private rate — a **51% saving** over market.

Student Learning Benefits · WSL Standard

- ✓ Hands-on, activity-based learning for stronger concept clarity
- ✓ Small batch learning with shared DIY kits to encourage collaboration
- ✓ Regular guidance from trained, on-site instructors
- ✓ Grade-wise curriculum aligned to age-appropriate STEM progression
- ✓ Continuous assessments to track understanding and improvement
- ✓ Structured course journals and workbooks for every student
- ✓ Digital progress tracking and evaluation support for teachers
- ✓ AI-assisted learning tools integrated within the curriculum
- ✓ Periodic parent communication on student learning progress
- ✓ Annual public exhibition — students present to PCMC, parents, media

06

LEARNING DESIGN

Grade 5–9 Curriculum

The pilot delivers a **continuous, progressive curriculum** — students who enter in Grade 5 build on the same foundation every year until Grade 9. Each grade has its own kit, its own learning outcomes, and its own assessments. This is the same curriculum delivered at Veer Baji (primary grades) and in the Sangli pilot (advanced modules).

GRADE 5

Mobile App Dev + Otto Bot

Block-based programming + Otto Bot walking robot. Introduces **logic, sequencing**, and the thrill of building something that moves.

GRADE 6

Arduino · Automation & IoT

Students wire up sensors, build automated systems (smart lights, water-level alarms, temperature loggers), and write **real embedded code**.

GRADE 7

Intelligent Robotics · ML Concepts

Introduces **ML fundamentals via LEO** — the programmable car. Students train simple models, build line-following and obstacle-avoiding robots.

GRADE 8

Web Dev + Robotic Arm Control

HTML, CSS, basic JavaScript — while programming a robotic arm (MG995/SG90). Students build a **web UI that physically moves the arm**.

GRADE 9 · CAPSTONE

Raspberry Pi · Real-World Automation

The finale year. Full Linux-based Raspberry Pi systems, Smart Home + IoT projects, drone workshops, and a **graduation project** showcased to PCMC, parents, and media.

Reference — A Student Report from Our System

Prajwal More, Grade 6, Roll 21 · **Arduino Nano Module**, AY 2024–25

Chapter scores — Intro to Arduino: 18/20 · LEDs & Circuits: 18/20 · Sensors: 16/20 · Sound & Temperature: 20/20 · Servos: 18/20 **Module total: 104/120 (86.7%) · Grade A**

Projects — LDR Security Alarm: 18/20 · Hand-Wave Light Switch: 18/20 · Auto Gate Opener: 18/20 · Motion Detector Alarm: 20/20 **Project total: 136/160 (85.0%)**

Every PCMC student receives this level of structured assessment, chapter by chapter, project by project. PCMC officials can view these reports anytime via the RoboPirate LMS.

PERIODS/WEEK

5-Year Financial Structure · Per School

YEAR 1	2026–27	■12,00,000	CSR-FUNDED
Complete lab build (furniture, interiors, wiring, paint, posters) + 198 items (90 grade kits, 17 workshop kits, 4 drones, 3D printer, laptop, projector, safety gear) + Year 1 full-time trainer + curriculum + LMS + teacher training. PCMC pays zero .			
YEAR 2	2027–28	■7,00,000	PCMC-FUNDED
Annual subscription — trainer salary + curriculum + kit consumables & replacements + LMS + quarterly impact reports + technical support.			
YEAR 3	2028–29	■7,00,000	PCMC-FUNDED
Same scope. Grade 5 entry batch now in Grade 7. Mid-pilot review .			
YEAR 4	2029–30	■7,00,000	PCMC-FUNDED
Same scope. Hardware consumables refresh . Expansion planning to additional PCMC schools (optional).			
YEAR 5	2030–31	■7,00,000	PCMC-FUNDED
Final pilot year. First entry batch graduates Grade 9 with 5 years of continuous STEAM. Independent impact study + case report delivered to PCMC.			
5-YEAR TOTAL · PER SCHOOL		CSR ■12L + PCMC■28L	■40,00,000

CSR Partner Network

RoboPirate sources the CSR partner. PCMC's only role is confirming school selection and issuing an MoU for the CSR partner's Schedule VII compliance documentation. Year 1 funds are released directly from the CSR partner to RoboPirate against milestones.

From our network: Cummins (already our Veer Baji partner) · Bajaj · Tata Motors · Forbes Marshall · Thermax · Tech Mahindra Foundation · Persistent Systems.

08 EXECUTION

Implementation & Next Steps

90-Day Launch Timeline · Year 1

Phase	Duration	Deliverables
1	Week 1–2 MoU signing	Tripartite MoU (PCMC + CSR Partner + RoboPirate) · site selection confirmed · room handover
2	Week 3–5 Lab build	Electrical, paint, wall theme, furniture install, wiring, poster install
3	Week 6–8 Equipment install	All 198 items delivered, installed, audited · photo record submitted to PCMC
4	Week 9–10 Trainer onboarding	Locally-hired trainer trained at RoboPirate HQ · LMS set up for the school
5	Week 11–12 Soft launch	Demo classes Grade 5–6 · PCMC + CSR partner inauguration event
6	Week 13+ Full operations	Regular 2-period-per-week schedule · all 5 grades running

Reporting & Accountability

- ✓ **Monthly** — attendance + syllabus progress auto-delivered via LMS dashboard
- ✓ **Quarterly** — impact report with student-level outcomes, project showcase, photo/video evidence
- ✓ **Annual** — comprehensive report: pre/post assessments, parent feedback, teacher review, financial utilization statement
- ✓ **Open inspection access** — PCMC officials can audit the lab unannounced at any time
- ✓ **Annual public exhibition** — students present projects to PCMC, parents, and media (Sangli model)

Exit & Renewal Terms — Outcome-Linked

At the end of each year, PCMC has a formal **review checkpoint**. If outcomes or delivery quality do not meet agreed benchmarks, **PCMC may exit with 90 days' notice — no penalty, no claim on installed hardware**. Hardware remains with the school for PCMC's continued use.

Next 5 Steps to Launch

1	Review meeting with PCMC Education Dept leadership	This week
2	School selection — PCMC identifies pilot school (Grade 5–9 with 300–400 students and ~250 sq.ft. room)	Week 2
3	CSR partner finalized by RoboPirate · tripartite MoU drafted	Week 3–4

4
