

Shifting to Hands-on Experiential Learning

The traditional "factory-based" education model often leads to boredom, low confidence, and a fear of failure. It stifles creativity and limits genuine engagement.

Inquiry-Based Learning

Fosters a creative mindset from an early age, encouraging students to ask questions and seek answers independently.

Transforming Societies

Moves communities from low to high productivity, converting consumers into producers of innovative ideas.

Practical Application

Utilizes working models and effective teaching aids, making complex science and math concepts tangible and understandable.

Concept Educreation specializes in providing comprehensive Interactive Science Labs, designed to integrate inquiry-based learning into the education system.

Light & Optics Exhibits

Day & Night Model

Shadow formation, time measurement concepts

Kaleidoscope

Multiple reflections, pattern creation

Fun Mirrors

Concave and convex mirror reflections

Color Shadows

Primary to secondary colors, white light formation

Periscope

Light path, reflection principles

Infinity Well

Multiple reflections, infinite images

Magnetism & Electricity

Magnetic Exhibits

- Magnetic field visualization
- Magnetic spring - attraction & repulsion
- 3D magnetic lines demonstration
- Electromagnet applications
- Magnetic crane operations

30

Total Exhibits

Covering electricity and magnetism concepts

Circuit Exhibits

- Series and parallel circuits
- Good vs bad conductors
- Simple motor mechanics
- Two-way switch systems
- Ohm's Law demonstrations

6

Grade Levels

Aligned with NCERT curriculum 5-10

Forces, Energy & Motion

Energy Sources

Windmill and solar fan exhibits demonstrate renewable energy conversion

Mechanics

Newton's cradle, pendulums, gyroscope show motion principles

Balance & Gravity

Center of gravity demonstrations with balancing exhibits

Newton's Laws

Three dedicated exhibits for each law of motion

Simple Machines

Pulleys, levers, wheel & axle, Archimedes' screw

Energy Conversion

Potential to kinetic energy demonstrations

Biology & Human Body

Skeletal System

85cm skeleton model - bones and joints

Circulatory System

Heart model demonstrating blood circulation

Genetics

DNA structure for heredity concepts

Nervous System

Brain parts model for coordination study

Complete human torso model covers digestion, respiration, and circulation systems

Mathematics Models

01

Geometry

Pythagoras theorem, triangles, quadrilaterals, circle area

02

Algebra

Polynomial identities: $(a+b)^2$, $(a+b)^3$, algebraic expressions

03

Number Theory

LCM demonstrations, Fibonacci series patterns

04

Problem Solving

Tower of Hanoi, tangram puzzles, probability models

Math Exhibits

Hands-on models for abstract concepts

Total Exhibits

Comprehensive NCERT curriculum coverage

Program Highlights

Implementation

Experienced professionals set up Interactive Science Labs in schools, sparking curiosity and scientific vision in young minds.

Teachers Training

Qualified trainers empower teachers with specialized training, reinforcing their crucial role in our education system.

Maintenance

We ensure continuous hands-on learning by taking full responsibility for the maintenance of our science lab models.

Let's Ignite Curiosity Together

We are committed to fostering a love for science through hands-on, immersive experiences. Partner with us to inspire the next generation of innovators!
